SOLAR ROMAN TILE ROOF MOUNTING SYSTEM

Solar Roman Tile Roof Mounting System is good solution for residential and commercial projects and suitable for almost flat roof. It accommodated all framed and frameless modules currently on the market. It provide for fast and simple fixing to rafters without affecting the integrity.

☆ Safety and Good Stability

The system designed by skilled engineers can meet the international standards. The main support components should be tested to ensure the strength, stable and safe.

☆ Easy installation

All components are pre-install which help saving labor cost and time

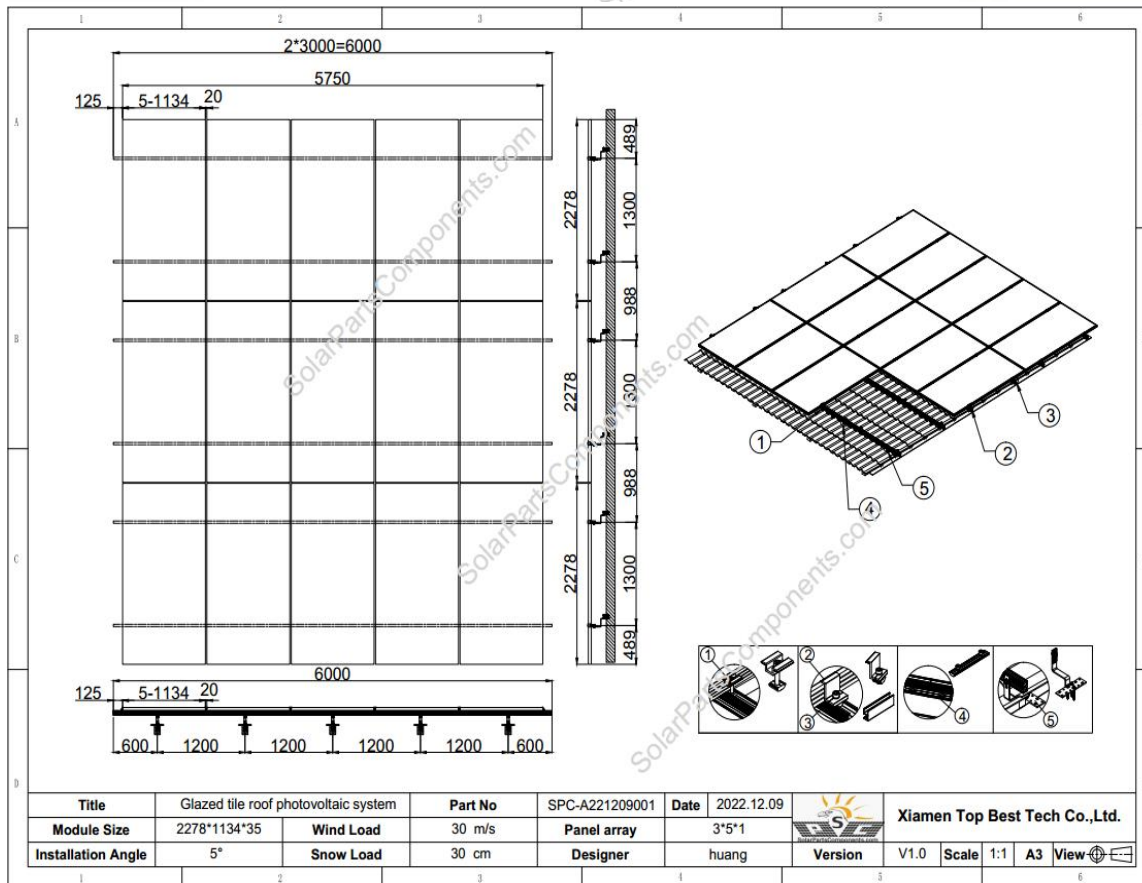

☆ Various Solution

This system is suitable for almost solar panel on the residential and commercial projects

★ Technical specification

Installation Site:	Roman Tile Roof
Material:	SUS304, AL6005-T5/6005-T5
Tilt Angle:	Flushed with roof up to 60 deg
PV Modules:	Framed, Frameless
Module Layout:	As Designed
PV Modules:	Portrait and Landscape
Wind load:	60m/s
Snow Load:	1.4kN/m ²
Building height:	Up to 20m
Standards:	AS/NZS 1170 & DIN 1055
Warranty:	10 years warranty
